

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

# ALBANIAN LANGUAGE GUIDE

Albanian is spoken by more than one million people in Albania and the neighboring sections of Yugoslavia. This Language Guide will enable you to ask directions, buy things or order a meal in these regions. Knowing a little Albanian will also help you get along with the people, for they will naturally be pleased to see a stranger showing enough interest in them to try to speak their language.

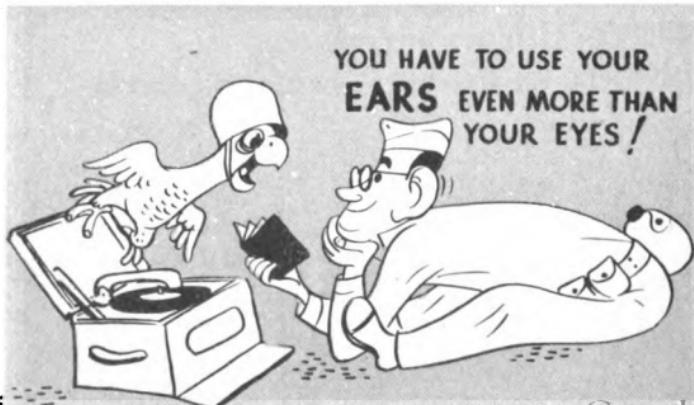

There are variations in the way Albanian is pronounced in different regions, just as there are variations in the way English is spoken in different parts of the United States. The pronunciation given on the phonograph records will be understood wherever Albanian is spoken, but it is best to try to speak like the people in the region in which you happen to be.

## How to Use the Records and Guide

The records that go with this Guide give you a number of the most important words and phrases in Albanian. Read the section called Hints on Pronunciation and then listen to the records until you know

the Useful Words and Phrases by heart. *Repeat each word out loud right after you hear it and say it exactly the way the Albanian speaker does.* Imitate the pronunciation as closely as you can, just as you might mimic someone who has an unusual accent. Try to get every detail of the pronunciation, even the rhythm and intonation. Follow the words in your Guide but use them only as a reminder; if you hear something different from what you see written, go by what you hear. *Remember that you can't get the sound of a language from the printed word alone—you have to use your ears even more than your eyes.* If you don't have the records and can't get an Albanian speaker to read the words, you will have to rely on the Hints on Pronunciation.

By the time you have practiced the Useful Words and Phrases several times you will know what sound

each letter stands for in the Guide. You will then be able to pronounce the Additional Expressions even though you have not actually heard them, and you will be able to form sentences of your own by using the section called Fill-in Sentences.

### **Hints on Pronunciation**

*All the words and phrases are written in a spelling which you read like English.* Each letter or combination of letters is used for the sound it normally represents in English and it *always* stands for that sound. Thus, "oo" is always to be read as in *too*, *boot*, *tooth*, *roost*, never as in anything else. Say these words and then pronounce the vowel sound by itself. That is the sound you must use every time you see "oo" in the Pronunciation column. If you should use some other sound—for example, the one in *blood* or the one in *door*—you might be misunderstood.

*Syllables that are accented—that is, pronounced louder than others—are written in capital letters.* *Curved lines (.) are used to show sounds that are pronounced together without any break;* for example, "N\_YUH" meaning "one."

The words are  
written in a simplified  
spelling, like this...

BUTTE.... B-YOOT

PHOENIX.... FEE-niks

PHILADELPHIA...fil-a-DELF-ya

POUGHKEEPSIE...po-KIP-see

SIOUX CITY... SOO-SIT-ee

WORCESTER...WOOST-ur

SCHENECTADY- ska-NEKT-a-dee

the SYL-la-bles  
that are pro-NOUNCED  
LOUD-er are in  
CAP-it-al LET-ters

## Special Points

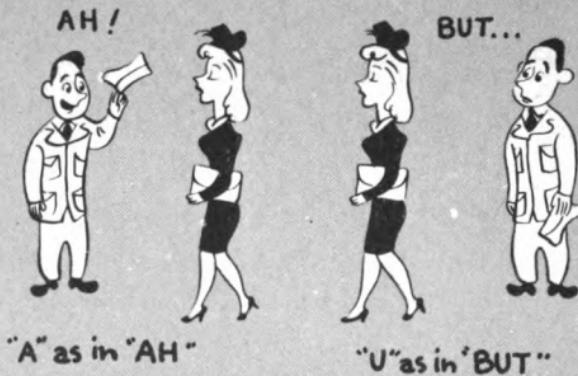

Here are a few points to note as you listen to the records.

**EE** when underlined, stands for a sound we don't have in English. To make it, round your lips as though to say "oo" and without moving them say "ee." Example: "DEE" meaning "two."

**U or UH** as in *but, cut, run*. Examples: "NUNT" meaning "nine," "N\_YUH" meaning "one."

**A or AH** as in *ah, palm, father*. Examples: "DOO-ah" meaning "I want," "tray-GO-ma" meaning "point."

- a* or A** in italics stands for the sound we have in *sofa, china, vanilla*. Example: "BOO-*ka*" meaning "bread."
- DH** stands for the "th" sound in *this, that, then, those*. It is written in your Guide as "dh," the way it is written in Albanian. Example: "DH\_YET" meaning "ten."
- RR** stands for a strongly rolled "r" sound like the telephone operator's trill when she says "thuh-r-r-ree" for "three." Example: "BEE-rra" meaning "beer."

## USEFUL WORDS AND PHRASES

*The following is the exact wording of the Albanian language records issued with this Guide:*

These records give you a few useful phrases in Albanian. To learn to say these phrases so that you will be understood, imitate the sounds exactly as you hear them. You will hear the English first, followed by the Albanian; then repeat the Albanian out loud, and say it *good and loud*. Remember! Repeat every Albanian phrase right after you hear it.

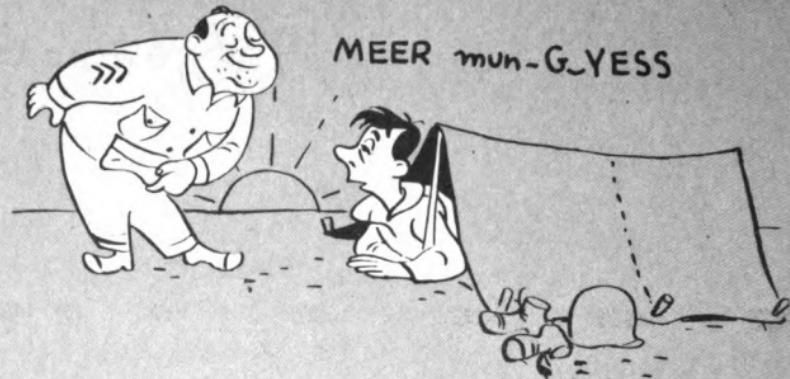

In the Albanian Language Guide which should be used with these records, all the phrases you will hear are written in a spelling which you read like English.

Listen to the records six or seven times and you will know the phrases by heart.
